Summary — Full-Stack Developer with 4+ years of experience building enterprise-grade applications in Cybersecurity and EdTech. Proficient in Angular, TypeScript, C#, REST APIs, and MySQL, with a strong track record of delivering security operations platforms, governance reporting systems, and threat advisory tools at scale. Adept at owning features end-to-end, driving performance improvements, and working closely with cross-functional teams to ship products that matter.

Technical Skills

- **Frontend:** Angular, JavaScript, TypeScript, HTML5, CSS3, React
- **Backend:** Python, C#, REST APIs
- **Database:** MySQL, SQL
- **Cloud & DevOps:** AWS, Azure DevOps, Git
- **Tools:** GitHub Copilot, ChatGPT, Claude, Gemini

Work Experience

SISA Forensic-Driven Cybersecurity

Software Engineer

Jun 2024 – Present

Bangalore, KA

ProACT – Managed Detection, Response & Governance Platform

- Develop and maintain enterprise cybersecurity applications using Angular, C#, REST APIs, and MySQL.
- Built real-time monitoring and management modules for Logs, Alerts, Incidents, and Ticket Management workflows.
- Built and deployed a C# backend scheduler service to automatically generate and deliver scheduled security and operational reports directly to clients and SOC leads at configurable frequencies.
- Developed shift handover functionality enabling analysts to manage alerts, incidents, escalations, and operational updates across shifts.
- Developed the Threat Advisory Platform for creating, managing, and distributing security advisories to enterprise customers.
- Implemented advisory templates, publishing workflows, and customer notification mechanisms.
- Designed and developed the Governance Reporting Platform supporting executive and customer reporting.
- Built dynamic report generation modules for CXO Reports, Weekly Reports, Monthly Reports, and QMR Reports.
- Resolved code-level and package-level vulnerabilities by identifying security risks and upgrading dependencies to maintain a secure and up-to-date codebase.
- Provided ongoing bug fixes, feedback-driven improvements, and direct technical support to SOC teams to ensure smooth day-to-day platform operations.
- Optimized application performance and backend APIs to support high-volume security operations.

SISA One – Unified Security, Compliance & Privacy Platform

- Developed reusable Angular component libraries adopted across multiple SISA products.
- Contributed to the consolidation of security, compliance, and privacy products into a unified platform.
- Managed MySQL schema updates and migration activities supporting platform-wide integrations.
- Built responsive and reusable UI modules to improve development efficiency and user experience.

Infinity Learn Pvt. Ltd.

Frontend Developer

Mar 2022 – Mar 2024

Bangalore, KA

Interactive App Builder

- Developed a drag-and-drop application builder using JavaScript and Blockly.
- Implemented live CSS configuration and dynamic component rendering capabilities.
- Created reusable blocks enabling non-technical users to build applications visually.
- Improved maintainability by modularizing business logic and UI workflows.

Enterprise Drive Management System

- Built secure file management capabilities with role-based access control.
- Developed folder management and expiry-based secure sharing features.
- Automated reporting workflows reducing manual operational effort.
- Enhanced enterprise document management usability and security.

Achievements

- Recipient of the **SPOT Award** at SISA for outstanding contribution and ownership in delivering critical business features.
- Recipient of the **Culture Award** at SISA for demonstrating collaboration, ownership, and organizational values.
- Recognized for successful delivery of enterprise cybersecurity, governance, and reporting solutions.

Personal Projects

Restaurant Management System	Java, Angular
• Developed a full-stack restaurant management platform covering order processing, billing, payments, and table management. • Built inventory management modules for real-time stock tracking. • Implemented menu-level and cart-level offer management systems. • Developed expense tracking and Profit & Loss reporting modules. • Created a Live Order Screen for operational order monitoring.	

Educational Background

R.G.P.V. University, Bhopal <i>Bachelor of Technology in Computer Science Engineering</i> Institute: Millennium Institute of Technology and Science	Jun 2017 – Jul 2021 <i>Bhopal, M.P.</i>
H.N.K Inter College, Arrah <i>Intermediate in Science</i>	May 2014 – May 2016 <i>Arrah, Bihar</i>
